- ✓ Accepted as carry-on baggage in the cabin of the aircraft
- ✓ Prepared for padlock
- ✓ Pre-cut Foam

ESPECIALLY RECOMMENDED IN:

All sectors

DESCRIPTION

Waterproof carrying case Compact design and robust injection moulded construction with stainless steel metal parts and a black finish. It is stackable, shock, dust and water resistant with IP-67 protection rating, making it perfect for transporting electronic equipment, materials or objects in complete safety. It has a sealing cap, pressure valve and folding carrying handle. It is accepted as carry-on baggage in the cabin of the aircraft and is prepared for padlock. It features pre-cut inner foam, which dampens bumps during transport. For safe transport of small electronic equipment, materials or fragile objects.
